* Statistics Canada 2011 Census

It has been established through a number of studies nationally, globally and locally that we are part of an aging population. Life expectancy has increased therefore the need for adult children to care for their loved ones or parents has increased significantly. Currently, many of the large cohort of baby boomers (persons born between 1946 and 1964), who will become a part of the elderly population of the future, are caregivers for their aging parents. The baby boomers of today are likely to spend more years caring for a parent than for children. These trends have created the need to gain a better understanding of the patterns of caregiving by adult children of their aging parents. And we need to learn more about how the adult children (sandwich generation) will need to assist their parents in managing and planning ahead for the consequences of aging rather than waiting for the crisis to force us to plan.

Nicole Blais | Expo Founder and Show Producer

The entrepreneur spirit is strong in Nicole's family, and it has driven her to own and operate her first business at the age of 19. The same entrepreneurial mindset and program development have made her a leader in our community. She is effective in creating positive change for her community. She enjoys giving back and paying goodness forward.

Nicole is the founder/President of Goshenite Seniors Services Inc. The business was launched in September 2015. Our "Hybrid" business model offers our clients (seniors) and their children a "one stop shop of services for seniors". They need not look any further as we are here to accommodate our clients with exceptional service. In the fall of 2017, I launched our Seniors Driving Program and the 50+ Lifestyle Magazine Publication.

As the business grew Nicole developed a Franchise model of Goshenite Seniors Services for Canada and the US. We will officially launch our Franchise model in the Fall of 2023.
